DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed May 24, 2006 has been entered. No claims have been amended. No claims have been cancelled. No claims have been added. Claims 1-8 are still pending in this application, with claims 1, 6, and 8 being independent.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. In regards to claim 1, the claim recites the limitation "a plurality of tunable bandpass filters" in line 4. The claim also recites the limitations "each filter", line 4 and "each bandpass filter", line 5. It is unclear as to if "each filter" and "each bandpass filter" is referring to "a plurality of tunable bandpass filters" or if they are complete and different limitations.
5. Claim 6 recites the limitation "said digitized combined signal" in line 10. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

6. Claim 8 is allowed.

7. The following is a statement of reasons for the indication of allowable subject matter: The invention as claimed is not disclosed nor rendered obvious in view of the prior art of record. As to claim 8, the prior art of record fails to teach or suggest, alone or in combination, the recited method, in which a desired signal is filtered through a tunable bandpass filter, a predetermined undesired signal is received from the broadcast band, the predetermined undesired signal is filtered through a second tunable bandpass filter; adjusting an automatic gain control for the second tunable bandpass filter to minimum gain, and digitizing the desired signal. No prior art was found that discloses or teaches the limitations of claim 8.

8. Claims 1 and 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

9. Claims 2-5 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
